Perm-A-Barrier® VPO
Pare-air perméable à la vapeur à application fluide conçue pour une exposition aux UV indirecte et intermittente

Description du produit

Perm-A-Barrier® VPO is a fluid applied, one component, acrylic membrane that provides continuous air tightness and water protection throughout the wall assembly. Perm-A-Barrier® VPO is dark-colored and designed for exposure to indirect and intermittent sunlight, such as behind open joint rain screen systems.

Perm-A-Barrier® VPO is for wall assemblies requiring “breathable” characteristics. As a vapor permeable membrane, Perm-A-Barrier® VPO permits the transfusion of water vapor that may otherwise condense in the wall structure; but is impermeable to liquid water, which allows the material to act as a water drainage plain.

The Volatile Organic Compound (VOC) content of Perm-A-Barrier® VPO is less than 20 g/L.
